

ABDM-COMPLIANT ARCHITECTURE

NHA SANDBOX READY (M1/M2/M3)

★ SEED ROUND (\$500K – \$2.0M)

PKV Global Infotech Private Limited

Unifying Fragmented Public Health Operations via ABDM-Compliant Infrastructure & Resilient Offline-First Intelligence.

PRIMARY SECTOR
HealthTech & Public SaaS

NATIONAL ALIGNMENT
Ayushman Bharat (ABDM / NHA)

TARGET ROUND
Seed / Institutional Pre-Seed

Core Executive Highlights

OFFLINE-FIRST

Unified Longitudinal Health Records

Breaks isolated public facility data silos through deep ABHA integration and interoperable FHIR R4 pipelines.

Cross-Facility Doctor & Staff Telemetry

System-wide tracking for clinical output across multiple government clinics, dispensaries, and hospitals.

Zero-Downtime Sync Engine

Guaranteed data capture during severe Tier-3 rural internet blackouts with encrypted delta auto-sync.

Fragmented Data & Broken Healthcare Delivery

1. Isolated Data Silos

Patient health data is locked inside disconnected public facilities (PHCs, CHCs, and District Hospitals).

- ✖ Zero longitudinal patient records across multiple visit points.
- ✖ Over 42% duplicate diagnostic spend and repeated lab tests.
- ✖ Inability to trigger timely cross-facility emergency referrals.

Redundant Diagnostic Spend: ₹14,200+ Cr/yr

2. Workforce Blindspots

State administrations lack macro-level visibility into doctor availability, workloads, and real clinical output.

- ✖ No unified tracking for doctors deputed across multiple centers.
- ✖ Severe ghost-attendance and clinical idle time in rural clinics.
- ✖ Inaccurate resource allocation leading to severe doctor burnout.

Workforce Utilization Gap: ~38% Untracked

3. Tier-3 Network Blackouts

Legacy cloud-only hospital software collapses when rural internet drops, halting OPD consultations completely.

- ✖ Cloud-dependent EHRs freeze during frequent rural power outages.
- ✖ Staff reverts to paper registers, corrupting digital databases.
- ✖ Substantial backlogs and delayed patient check-ins (1-2 hrs delay).

Primary Health Centers Affected: 72% Intermittent Down

A Unified, Offline-First Health Stack

ABDM-Native Architecture

Seamless integration into the Ayushman Bharat Digital Mission National Health Stack ecosystem.

- ✓ Instant 14-digit **ABHA ID** generation & verification via OTP/Aadhaar/Biometric.
- ✓ Pre-linked to **HFR** (Health Facility) and **HPR** (Professional) registries.
- ✓ Standardized FHIR R4 data schema enabling universal clinical record sharing.

Interoperability Standard: **FHIR R4 / ABDM v3.0**

Synchronous-Offline Engine

Zero-latency edge operations guaranteed even with zero cellular or broadband connectivity.

- ✓ Local edge-first database for OPD, billing, pharmacy, and triage registers.
- ✓ Automated background queue that delta-syncs encrypted packets upon network recovery.
- ✓ Deterministic conflict-resolution avoiding data collisions across multiple clinic tablets.

Offline Reliability: **100% Up-time at Edge**

Cross-Facility Tracking

Universal clinical identity and telemetry framework across all state healthcare facilities.

- ✓ Unified provider ID tracking clinical hours and patient consultations across dispensaries.
- ✓ Real-time administrative dashboards for District Medical Officers (DMOs) & Health Secretaries.
- ✓ Automated duty-roster balancing preventing rural staffing vacancies.

Administrative Efficiency: **+45% Doctor Output**

Technical Novelty & Proprietary Innovation

Proprietary Sync Engine

Engineered specifically for extreme low-bandwidth (<2G/EDGE) & intermittent packet loss conditions.

- ✓ **Delta-Chunk Compression:** Only transacting changed fields, reducing bandwidth footprint by 94%.
- ✓ **CRDT-Inspired Conflict Resolution:** Multi-device concurrent editing on edge nodes with zero data loss.
- ✓ **AES-256 GCM Local Encryption:** End-to-end data security at rest on local hardware tablets.

Bandwidth Optimization: 94% Compression

Workforce AI Optimization

Algorithmic load-balancing and doctor-patient matching for public healthcare distribution.

- ✓ **Cross-Center Telemetry:** Verifies doctor presence, consultation throughput, and diagnostic adherence.
- ✓ **Macro Resource Placement:** AI recommends doctor re-allocation based on localized epidemic surges.
- ✓ **Ghost Attendance Detection:** Geofenced biometrics and cryptographic session validation.

Workforce Transparency: 100% Auditability

Consent Manager Engine

Zero-trust data exchange layer strictly enforcing DPDP Act 2023 and ABDM Health Data Policies.

- ✓ **Ephemeral Tokenized Access:** Patients grant time-bound, purpose-specific medical history sharing.
- ✓ **Revocable Permissions:** Dynamic consent lifecycle management via patient ABHA mobile app.
- ✓ **Immutable Audit Logs:** Cryptographic trail of all record accesses for legal & regulatory compliance.

Regulatory Framework: DPDP Act 2023 Ready

Government & **ABDM** Alignment

ABHA Integration

Ayushman Bharat Health Account 14-digit patient ID generation, biometric/Aadhaar verification, and tokenized wallet linking.

PATIENT REGISTRY

HFR Registry

Health Facility Registry verified onboarding of all primary, secondary, and tertiary public healthcare institutions with geo-fencing.

FACILITY REGISTRY

HPR Registry

Healthcare Professionals Registry integration for verified doctors, nurses, and lab techs with multi-deputation mapping.

DOCTOR REGISTRY

NHA Sandbox

Complete readiness for Milestone 1 (ABHA Creation), Milestone 2 (HIP - Provider), and Milestone 3 (HIU - User) certifications.

M1, M2, M3 READY

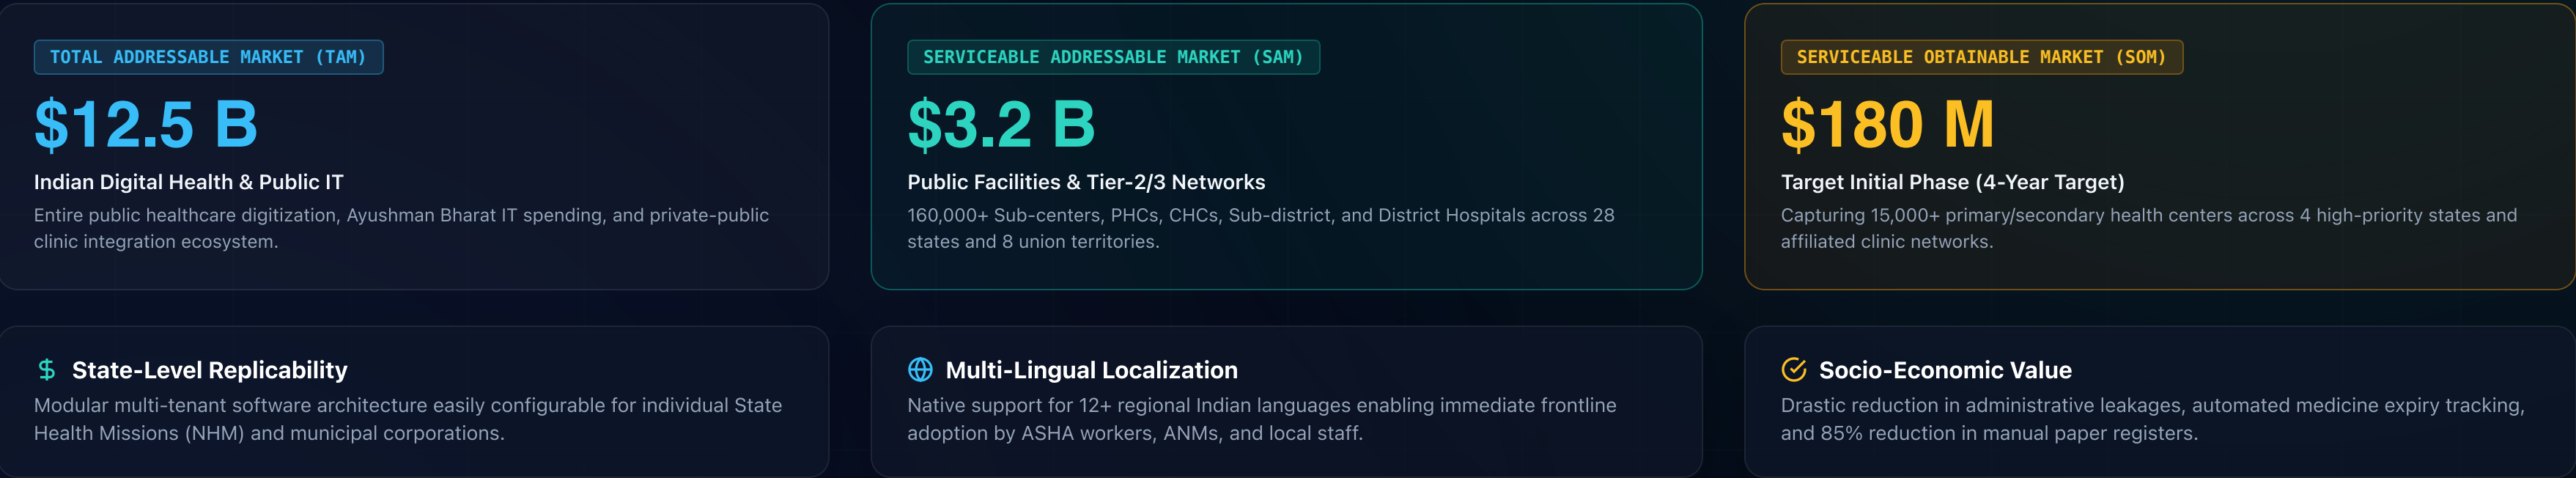

National Digital Health Mission Alignment:

Bridging rural health facilities directly to India's Sovereign Health Cloud with zero infrastructure friction.

100% OPEN STANDARDS COMPLIANT

Market Opportunity & Scalability

Business & Revenue Model

PRIMARY STREAM (B2G)

Government SaaS (ALC/AMC)

Annual Software Licensing & Maintenance Contracts with State Health Missions & Municipal bodies.

- ✓ **District Hospital Stack:** ₹6L - ₹12L / facility / year.
- ✓ **CHC & PHC Clustered Tier:** ₹85,000 - ₹1.5L / center / year.
- ✓ 3-5 Year multi-year recurring contract lock-ins.

Gross Margins: **84%+ High-Margin SaaS**

SECONDARY STREAM (B2B)

Private Health Chains

Tiered subscription models for private nursing homes, clinic chains, and diagnostic networks partnering with public schemes.

- ✓ **Clinic Pro Tier:** ₹3,500 - ₹8,000 / month / doctor.
- ✓ **PM-JAY Fast-Track Module:** Integrated scheme claims & automated verification.
- ✓ Seamless ABDM compliance out-of-the-box.

Customer Payback: **< 3.5 Months CAC**

TERTIARY EXPANSION

Macro Analytics & Insights

Future-ready aggregate, anonymized epidemiological and capacity-planning intelligence.

- ✓ **Epidemic Heatmaps:** Early warning outbreak detection for state health surveillance.
- ✓ **Pharmaceutical Supply Forecasting:** Preventing critical medicine stockouts.
- ✓ Strict compliance with non-PII anonymization standards.

Retention Rate: **> 98% (Govt Stickiness)**

Domain Experts Driving Execution

Founders & Leadership

Business Operations & MSME Strategy

Deep executive experience across MSME frameworks, public enterprise workflows, government stakeholder management, and scalable IT systems delivery. Proven track record in large-scale operational deployments and institutional compliance.

- MSME Frameworks
- Public Health IT
- Operations

Engineering Leadership

Distributed Systems & Sync Architecture

Specialized in offline-first distributed databases, edge compute, low-latency sync protocols, and cloud infrastructure. Deep mastery over resilient data architectures under severe network drops and high packet loss environments.

- Offline-First Engine
- CRDT Protocols
- Cloud & Edge

Health Informatics & Policy

ABDM Standards & Security Advisory

Clinical workflow experts with deep specialization in NHA Sandbox certification, FHIR R4 interoperability schemas, SNOMED CT terminology, and DPDP Act 2023 zero-trust data protection compliance.

- ABDM / NHA Sandbox
- FHIR R4
- DPDP Act 2023

Roadmap & Implementation Milestones

PHASE 1 • Q1–Q2 2026

ABDM Integration & Prototype

- Completion of NHA Sandbox M1, M2, and M3 test harnesses.
- Hardening proprietary offline delta-sync engine.
- Formal DPIIT Startup India Recognition & IPR filing.

SANDBOX VALIDATED

PHASE 2 • Q3–Q4 2026

District Pilots & Field Testing

- Live pilot deployment in 50+ government PHCs and CHCs in target district.
- Doctor telemetry & multi-facility attendance verification.
- 250,000+ patient ABHA registrations and EHR sync.

50+ LIVE FACILITIES

PHASE 3 • 2027

Statewide Commercial Rollout

- State Health Mission commercial tenders (B2G ALC contracts).
- Scale to 1,000+ public health centers & affiliated clinics.
- Launch B2B private clinic & diagnostic network tier.

1,000+ CENTERS • ARR ₹12 CR

PHASE 4 • 2028+

National Scale & AI Health

- Pan-India expansion across 5+ states (10,000+ facilities).
- Predictive medicine inventory forecasting & stockout prevention.
- State-level epidemiological surveillance dashboards.

PAN-INDIA LEADERSHIP

Digital Transformation for Public Health

FUNDING OPPORTUNITY

Seed Round: \$500K - \$1.5M

(₹4.0 Cr - ₹12.5 Cr) For Scale & Pilot Acceleration

Targeted deployment of capital to capture early state-level mover advantage, harden offline-first sync IP, and achieve operational profitability across public health networks.

ALLOCATION CATEGORY	SHARE	TARGET OUTPUT
Tech & Offline IP R&D	40%	Zero-loss sync engine & ML workforce engine
Field Pilots & State Deployments	30%	50+ District Facilities onboarding & live telemetry
NHA Compliance & Audits	15%	M1/M2/M3 certification, DPDP/HIPAA audits
Operations, Talent & GTM	15%	Field implementation engineers & BD team

☆ Our Long-Term Mission

"To construct the resilient, sovereign digital nervous system for India's public health operations—empowering every doctor, eliminating administrative leakage, and guaranteeing unbroken, universal healthcare records for every citizen."
